

PRESCRIPTION REFILLS

It is always best to anticipate your prescription refill needs and have any necessary prescriptions written or e-prescribed during your scheduled office visit or treatment. Please bring your pharmacy number along with the container of the medicine that needs to be refilled. If you do not have a scheduled office visit and need a refill, please call the pharmacy number on your prescription directly for assistance. Your pharmacy will contact us should your medication require a prescription renewal. All prescription requests will be handled promptly.

FILL PRESCRIPTIONS ON-SITE INSTEAD OF MAKING ANOTHER TRIP

As a service to our patients, we can provide medication dispensing for oral chemotherapy medications we prescribe as well as some other medications related to your treatment. We know how difficult it is to obtain some of these medications. Physician medication dispensing ensures that your medication is available to you as quickly as possible.

We also know how expensive these medications can be, and we want to save you as much time and frustration as possible.

The physician dispensing service is available to all cCARE patients. We dispense medications for chemotherapy and nausea, as well as steroids and other supportive care needs. The benefits of this service include:

- Quicker insurance authorization process
- A close working relationship between the physician dispensary and the physician to answer questions
- Reduced time and travel (get your medication at the same place you have your appointment)
- The potential of reduced cost – we have financial counselors and grant coordinators on-site who can organize financial assistance

Feel free to ask your doctor about physician dispensing during your next appointment or contact our dispensing pharmacy directly at:

Fresno: 559-326-1219

La Jolla: 858-552-1410 Ext: 1211

This is a courtesy service and you are not obligated to obtain your prescriptions through our dispensary.
